

3.1 THE TAXONOMY TABLE

THE KNOWLEDGE DIMENSION	THE COGNITIVE PROCESS DIMENSION					
	1. REMEMBER	2. UNDERSTAND	3. APPLY	4. ANALYZE	5. EVALUATE	6. CREATE
A. FACTUAL KNOWLEDGE						
B. CONCEPTUAL KNOWLEDGE						
C. PROCEDURAL KNOWLEDGE						
D. META- COGNITIVE KNOWLEDGE						

4.1 THE KNOWLEDGE DIMENSION

MAJOR TYPES AND SUBTYPES	EXAMPLES
A. FACTUAL KNOWLEDGE —The basic elements students must know to be acquainted with a discipline or solve problems in it	
AA. Knowledge of terminology	Technical vocabulary, musical symbols
AB. Knowledge of specific details and elements	Major natural resources, reliable sources of information
B. CONCEPTUAL KNOWLEDGE —The interrelationships among the basic elements within a larger structure that enable them to function together	
BA. Knowledge of classifications and categories	Periods of geological time, forms of business ownership
BB. Knowledge of principles and generalizations	Pythagorean theorem, law of supply and demand
BC. Knowledge of theories, models, and structures	Theory of evolution, structure of Congress
C. PROCEDURAL KNOWLEDGE —How to do something, methods of inquiry, and criteria for using skills, algorithms, techniques, and methods	
CA. Knowledge of subject-specific skills and algorithms	Skills used in painting with watercolors, whole-number division algorithm
CB. Knowledge of subject-specific techniques and methods	Interviewing techniques, scientific method
CC. Knowledge of criteria for determining when to use appropriate procedures	Criteria used to determine when to apply a procedure involving Newton's second law, criteria used to judge the feasibility of using a particular method to estimate business costs
D. METACOGNITIVE KNOWLEDGE —Knowledge of cognition in general as well as awareness and knowledge of one's own cognition	
DA. Strategic knowledge	Knowledge of outlining as a means of capturing the structure of a unit of subject matter in a textbook, knowledge of the use of heuristics
DB. Knowledge about cognitive tasks, including appropriate contextual and conditional knowledge	Knowledge of the types of tests particular teachers administer, knowledge of the cognitive demands of different tasks
DC. Self-knowledge	Knowledge that critiquing essays is a personal strength, whereas writing essays is a personal weakness; awareness of one's own knowledge level

3.3 THE SIX CATEGORIES OF THE COGNITIVE PROCESS DIMENSION AND RELATED COGNITIVE PROCESSES*

PROCESS CATEGORIES	COGNITIVE PROCESSES AND EXAMPLES
1. REMEMBER	Retrieve relevant knowledge from long-term memory.
1.1 RECOGNIZING	(e.g., Recognize the dates of important events in U.S. history)
1.2 RECALLING	(e.g., Recall the dates of important events in U.S. history)
2. UNDERSTAND	Construct meaning from instructional messages, including oral, written, and graphic communication.
2.1 INTERPRETING	(e.g., Paraphrase important speeches and documents)
2.2 EXEMPLIFYING	(e.g., Give examples of various artistic painting styles)
2.3 CLASSIFYING	(e.g., Classify observed or described cases of mental disorders)
2.4 SUMMARIZING	(e.g., Write a short summary of the events portrayed on videotapes)
2.5 INFERRING	(e.g., In learning a foreign language, infer grammatical principles from examples)
2.6 COMPARING	(e.g., Compare historical events to contemporary situations)
2.7 EXPLAINING	(e.g., Explain the causes of important eighteenth-century events in France)
3. APPLY	Carry out or use a procedure in a given situation.
3.1 EXECUTING	(e.g., Divide one whole number by another whole number, both with multiple digits)
3.2 IMPLEMENTING	(e.g., Determine in which situations Newton's second law is appropriate)
4. ANALYZE	Break material into constituent parts and determine how parts relate to one another and to an overall structure or purpose.
4.1 DIFFERENTIATING	(e.g., Distinguish between relevant and irrelevant numbers in a mathematical word problem)
4.2 ORGANIZING	(e.g., Structure evidence in a historical description into evidence for and against a particular historical explanation)
4.3 ATTRIBUTING	(e.g., Determine the point of view of the author of an essay in terms of his or her political perspective)
5. EVALUATE	Make judgments based on criteria and standards.
5.1 CHECKING	(e.g., Determine whether a scientist's conclusions follow from observed data)
5.2 CRITIQUING	(e.g., Judge which of two methods is the best way to solve a given problem)
6. CREATE	Put elements together to form a coherent or functional whole; reorganize elements into a new pattern or structure.
6.1 GENERATING	(e.g., Generate hypotheses to account for an observed phenomenon)
6.2 PLANNING	(e.g., Plan a research paper on a given historical topic)
6.3 PRODUCING	(e.g., Build habitats for certain species for certain purposes)

4.1 THE KNOWLEDGE DIMENSION

MAJOR TYPES AND SUBTYPES	EXAMPLES
<p>A. FACTUAL KNOWLEDGE—The basic elements students must know to be acquainted with a discipline or solve problems in it</p>	
<p>AA. Knowledge of terminology</p>	<p>Technical vocabulary, musical symbols</p>
<p>AB. Knowledge of specific details and elements</p>	<p>Major natural resources, reliable sources of information</p>
<p>B. CONCEPTUAL KNOWLEDGE—The interrelationships among the basic elements within a larger structure that enable them to function together</p>	
<p>BA. Knowledge of classifications and categories</p>	<p>Periods of geological time, forms of business ownership</p>
<p>BB. Knowledge of principles and generalizations</p>	<p>Pythagorean theorem, law of supply and demand</p>
<p>BC. Knowledge of theories, models, and structures</p>	<p>Theory of evolution, structure of Congress</p>
<p>C. PROCEDURAL KNOWLEDGE—How to do something, methods of inquiry, and criteria for using skills, algorithms, techniques, and methods</p>	
<p>CA. Knowledge of subject-specific skills and algorithms</p>	<p>Skills used in painting with watercolors, whole-number division algorithm</p>
<p>CB. Knowledge of subject-specific techniques and methods</p>	<p>Interviewing techniques, scientific method</p>
<p>CC. Knowledge of criteria for determining when to use appropriate procedures</p>	<p>Criteria used to determine when to apply a procedure involving Newton's second law, criteria used to judge the feasibility of using a particular method to estimate business costs</p>
<p>D. METACOGNITIVE KNOWLEDGE—Knowledge of cognition in general as well as awareness and knowledge of one's own cognition</p>	
<p>DA. Strategic knowledge</p>	<p>Knowledge of outlining as a means of capturing the structure of a unit of subject matter in a textbook, knowledge of the use of heuristics</p>
<p>DB. Knowledge about cognitive tasks, including appropriate contextual and conditional knowledge</p>	<p>Knowledge of the types of tests particular teachers administer, knowledge of the cognitive demands of different tasks</p>
<p>Dc. Self-knowledge</p>	<p>Knowledge that critiquing essays is a personal strength, whereas writing essays is a personal weakness; awareness of one's own knowledge level</p>
